Week 1 - Daily Nutrition & Body Log

Weigh first thing in the morning, after the toilet, before food. Judge progress on the 7-day average, never a single day. Targets: protein 180 g/day; calories = maintenance -400 to -500 (set once maintenance is known).

Day	Date	Weight (kg)	Calories	Protein (g)	Sleep (h)	Steps	Trained? (A/B/C)
Mon							
Tue							
Wed							
Thu							
Fri							
Sat							
Sun							
Avg							

Measurements (take once this week, then every 2 weeks)

Measure	Reading 1	Reading 2	Average
Height (cm) - barefoot, against wall			
Waist (cm) - tape at belly button, relaxed			
Blood pressure (pharmacy / GP)			

Rules of progression

1. Start each lift at a weight you can do for the BOTTOM of the rep range with 1-2 reps left.
2. Same weight next session - try to add reps.
3. Top of the range on ALL sets -> add weight next time (upper body +1-2.5 kg, legs +2.5-5 kg) and drop back to the bottom of the range.
4. No progress for 3 sessions -> check sleep and food first, then swap to a close variation.
5. Never grind a rep with bad form. Stop the set instead.
